

Hello there,

I hope this letter finds you well and in great spirits. I must confess; I have an unusual way of introducing myself. Rather than telling you about my passion for coding or my penchant for solving complex problems, I thought I'd begin with something a bit unexpected – my love for puzzles.

You see, puzzles and coding have a lot in common. Both involve taking seemingly disparate pieces and, through a combination of creativity and logic, piecing them together to form a bigger picture. So, when I stumbled upon the Software Internship opportunity at JPMorgan Chase, it felt like discovering the missing piece to my career puzzle.

Currently pursuing a degree in Computer Science at PES University, I've not only aced my courses but also embarked on some intriguing coding adventures. From crafting intricate algorithms to creating sleek user interfaces, I've enjoyed every moment of the journey. And now, I'm eager to bring my passion for problem-solving and my coding chops to JPMorgan Chase's illustrious tech team.

What really excites me about JPMorgan Chase is its dynamic environment and the opportunity to work on projects that have a global impact. The financial industry is evolving, and technology is at the forefront of this transformation. I want to be part of that evolution, contributing my ideas and skills to innovations that shape the future.

In my previous internships, I've dabbled in web development, data analysis, and even danced with databases. I've learned that adaptability is key in the ever-evolving tech landscape. I'm confident that my ability to learn quickly and my knack for thinking outside the box will be valuable assets as an intern at JPMorgan Chase.

But enough about me; let's talk about you. I'd love to hear more about JPMorgan Chase's exciting projects, the challenges your team faces, and how I can contribute to your mission. I believe that my passion for coding, my love for puzzles, and my desire to make a meaningful impact align perfectly with the culture at JPMorgan Chase.

I look forward to the possibility of joining your team and collaborating with some of the brightest minds in the industry. If you're up for the challenge of solving intriguing problems together, let's connect. You can reach me at +91 9916884047 or via email at write2nandann@gmail.com

Thank you for considering my unconventional introduction. I'm excited about the opportunity to be a part of the JPMorgan Chase team and to embark on new coding adventures together.

Sincerely,

Nandan N
